PRODUCT INFORMATION GUIDE

Electrical Alkaline Water Ionizers in Dubai

Aqua Best supplies electrical alkaline water ionizers as well as alkaline RO purifier options. Ask for the model, manufacturer's specifications and installation requirements that match the equipment you intend to buy. Pricing is quotation only.

QUOTATION ONLY

Supply, installation and service requirements are reviewed for your location and equipment.

Compare the actual manufacturer information

Before ordering	Confirm for the offered model
Water and filtration	Permitted feed conditions, included filters and model-specific performance information.
Outputs and settings	Manufacturer-specified operating range and intended uses.
Installation	Water connections, power supply, dispensing and required space.
Ownership	Cartridge availability, cleaning guidance and written warranty terms.

Distinguish an electrical ionizer from alkaline RO

Electrical ionizers use a powered process to produce their specified water outputs. An RO purifier with an alkaline or mineral stage is a different type of equipment. The names should not be used interchangeably when comparing quotations or replacement filters.

Aqua Best's existing 8 stage product page describes an alkaline RO purifier. If you want an electrical ionizer, state that requirement explicitly so the quotation identifies the intended appliance, its filtration and its connection arrangement.

Request a model-specific quotation

Tell the team whether you need a countertop or another installation arrangement, together with the available space and water connection. Share any existing appliance model if the enquiry concerns replacement or an upgrade.

The quotation should identify the manufacturer and model, included accessories, installation work and service requirements. Current availability, price and warranty terms are confirmed for the equipment proposed, without assuming every ionizer has the same features.

Installation and handover checklist

• Share your location, water use, incoming-water information and the required flow or daily output.

• Send installation-space photos and confirm the proposed model's water, power and drainage requirements.

• Ask the quotation to list the purifier, any tank and accessories, fitting work, consumables and handover instructions.

Common product questions

Can you publish a fixed ionizer price?

Aqua Best uses quotation-only pricing. Ask for the model, included accessories, installation and written warranty scope in the proposal.

What should an ionizer installation enquiry include?

Provide the intended use, water information, kitchen photos and available connections. Ask the quotation to identify the exact appliance, any prefiltration, installation work and replacement consumables.

Quotation, installation & after-sales support

Pricing	Quotation only. The written proposal identifies the equipment and included work.
AMC / servicing	Ask for an equipment-specific maintenance scope, consumables, exclusions and visit arrangements.
Warranty	Request the written warranty for the selected model, with coverage, exclusions and claim procedure.

Before requesting a quotation

Send your UAE location, intended use, water information, required flow or daily output, and photos of the installation space. For replacement parts, include the existing model and component labels.

Published ratings describe the listed equipment or configuration. Actual performance depends on feed water and operating conditions. Confirm the exact model, current specifications and manufacturer documentation in the quotation.
