PRODUCT INFORMATION GUIDE

Mobile and Portable RO Plants in the UAE

Aqua Best supplies, installs and services mobile and portable reverse osmosis plants. Plan a system around the water it must treat, the output you need and how it will move between UAE sites. Equipment, installation and servicing are priced by quotation.

QUOTATION ONLY

Supply, installation and service requirements are reviewed for your location and equipment.

Equipment illustration. Final model and configuration are confirmed in the quotation.

Specify what mobile means for your project

Requirement	What to include in the enquiry
Relocation	Expected frequency, route and access or dimensional limits.
Treatment	Feed analysis, intended use, output and production window.
Operating site	Space, utilities, storage, drainage and service access.
Package scope	Equipment, transport responsibilities, installation and commissioning.

Plan maintenance at each operating site

Aqua Best also accepts maintenance and servicing enquiries for mobile RO plants. Keep the equipment schedule, manufacturer and component labels, operating records and service history with the plant. When arranging a visit, include symptoms, current location and the next planned relocation.

Ask the service quotation to distinguish inspection, consumables, membranes, pump or control work, cleaning and repairs. Compatible parts and the actual work are assessed for the installed model. An annual agreement should name the covered equipment, visits, access arrangements and exclusions.

Agree supply and installation responsibilities

Aqua Best accepts mobile-plant supply and installation enquiries through its Dubai team. The proposed work should identify delivery arrangements, site preparation, water and electrical connections, storage, controls and commissioning. List responsibilities that belong to the customer or another contractor.

For each operating location, share site photos and any access or permit requirements. Agree which checks and handover records apply before the plant enters use. Timing, travel, lifting arrangements and additional work are confirmed for the project rather than assumed to be included in the plant price.

Installation and handover checklist

• Provide a current source-water analysis, intended use and required output with daily operating hours.

• Confirm the plant location, utilities, storage, connections and any concentrate or drainage arrangements.

• Ask for the proposed equipment duty, commissioning scope, handover records and maintenance responsibilities.

Common product questions

Can you quote work in another emirate or at a remote site?

Send the address area, site access and available utilities. The Dubai team reviews practical arrangements, travel and the requested work for that location; a local enquiry does not imply a separate branch.

What is the price of a portable RO plant?

Pricing is quotation only. Feed conditions, output, enclosure or mounting, transport responsibilities, installation and servicing scope affect the proposal. Ask for these items to be stated separately.

Quotation, installation & after-sales support

Pricing	Quotation only. The written proposal identifies the equipment and included work.
AMC / servicing	Ask for an equipment-specific maintenance scope, consumables, exclusions and visit arrangements.
Warranty	Request the written warranty for the selected model, with coverage, exclusions and claim procedure.

Before requesting a quotation

Send your UAE location, intended use, water information, required flow or daily output, and photos of the installation space. For replacement parts, include the existing model and component labels.

Published ratings describe the listed equipment or configuration. Actual performance depends on feed water and operating conditions. Confirm the exact model, current specifications and manufacturer documentation in the quotation.
