PRODUCT INFORMATION GUIDE

# Seawater RO System in Dubai, UAE

Seawater reverse osmosis desalination for Dubai and UAE projects. Review the intake, required daily output and finished-water needs, with capacity discussed in GPD or m³/day.

**QUOTATION ONLY**

Supply, installation and service requirements are reviewed for your location and equipment.

Equipment illustration. Final model and configuration are confirmed in the quotation.

## Confirm in the quotation

Treatment duty and selected components / Enclosure or mounting arrangement / Service access and ventilation requirements / Handling and transport responsibilities / Water, power and drainage connections / Commissioning and handover scope

## Seawater RO maintenance and spare parts

Keep the equipment schedule, manufacturer documentation, operating readings and service history with the plant. Follow the requirements for the installed configuration and record previous membrane or component work.

For a quotation, send any symptoms, model labels and the work required. Use the membrane, pump and valve guide and maintenance-contract checklist to distinguish parts supply, inspection, consumables and repair scope.

## Water analysis comes before plant selection

Share the intake arrangement, salinity or TDS, temperature and a current water analysis. Include any relevant changes in the source. A single TDS reading does not describe every condition needed to select pretreatment or RO equipment.

State the intended use and any finished-water requirements or project acceptance checks. Any necessary post-treatment, monitoring and handover requirements belong in the proposal.

## Installation and handover checklist

• Provide a current source-water analysis, intended use and required output with daily operating hours.

• Confirm the plant location, utilities, storage, connections and any concentrate or drainage arrangements.

• Ask for the proposed equipment duty, commissioning scope, handover records and maintenance responsibilities.

## Common product questions

### How much does a seawater RO system cost?

Pricing is quotation only. Feed conditions, production duty, pretreatment, equipment, site work, storage and commissioning affect the scope. Ask for the included items and responsibilities to be listed.

### Can I select a seawater plant from a TDS reading alone?

A TDS reading is one piece of information. Provide the source-water analysis, temperature, intended use and production requirements so pretreatment and the proposed RO process can be reviewed together.

## Quotation, installation & after-sales support

| | |
|---|---|
| **Pricing** | Quotation only. The written proposal identifies the equipment and included work. |
| **AMC / servicing** | Ask for an equipment-specific maintenance scope, consumables, exclusions and visit arrangements. |
| **Warranty** | Request the written warranty for the selected model, with coverage, exclusions and claim procedure. |

### Before requesting a quotation

Send your UAE location, intended use, water information, required flow or daily output, and photos of the installation space. For replacement parts, include the existing model and component labels.

Published ratings describe the listed equipment or configuration. Actual performance depends on feed water and operating conditions. Confirm the exact model, current specifications and manufacturer documentation in the quotation.

ANNUAL MAINTENANCE CONTRACT

# AMC coverage and terms

AQUA BEST WATER TREATMENT EQUIPMENT TRADING LLC

The AMC applies only to the water treatment system and service location identified in the customer's quotation or contract. It is valid for 12 months from the agreed start date. The number and timing of service visits, included consumables, and contract price are as stated in the quotation.

## Equipment-specific maintenance

For softeners, media filters, UV units, chillers, commercial RO plants, and industrial systems, the visit frequency and included replacements must be listed separately in the site-specific quotation.

## Scheduled service

During a scheduled visit, Aqua Best will inspect the covered system, check for visible leaks and operating issues, and replace only the consumables specified in the contract. Service scope depends on the system model, installed configuration, and access to the equipment.

## Terms and conditions

1. The AMC covers only the visits, consumables, and work expressly stated in the quotation or signed contract.

2. Additional cartridges, media, resin, membranes, UV lamps, electrical parts, pumps, repairs, and modifications are charged separately unless specifically included.

3. Aqua Best will explain any additional recommended work and obtain the customer's approval before carrying out chargeable work.

4. The customer must provide safe access to the equipment and ensure that the required water and electrical supplies are available during the visit.

5. Service visits are arranged by appointment. If access is unavailable at the agreed time, the visit must be rescheduled subject to appointment availability.

6. The AMC does not cover damage caused by misuse, unauthorised repair, abnormal water conditions, power fluctuations, external leaks, or other causes outside the listed service scope.

7. The AMC price, payment schedule, and VAT treatment are as stated in the quotation.

8. The AMC applies to the equipment and service address recorded in the contract. Changes to the equipment or location may require a revised quotation.

9. Any warranty on replaced parts is subject to the applicable manufacturer or supplier warranty.

10. Renewal, cancellation, emergency callouts, and response times are governed by the terms stated in the quotation or signed contract.

Pricing is quotation only. Product warranty terms are confirmed separately.
